Abstract:

JP 2000312550 A

NOVELTY A cylindrical holder (1) has protruding portion (4) having through-hole at ends. Bait holding rod (8) is axially inserted into the through-hole, so that fishing line provided with a knot is adoptable.

USE For fishing rod.

ADVANTAGE Enables direct attachment of stopper to the long fishing line, as bait holding rod which is axially inserted into the through-hole.

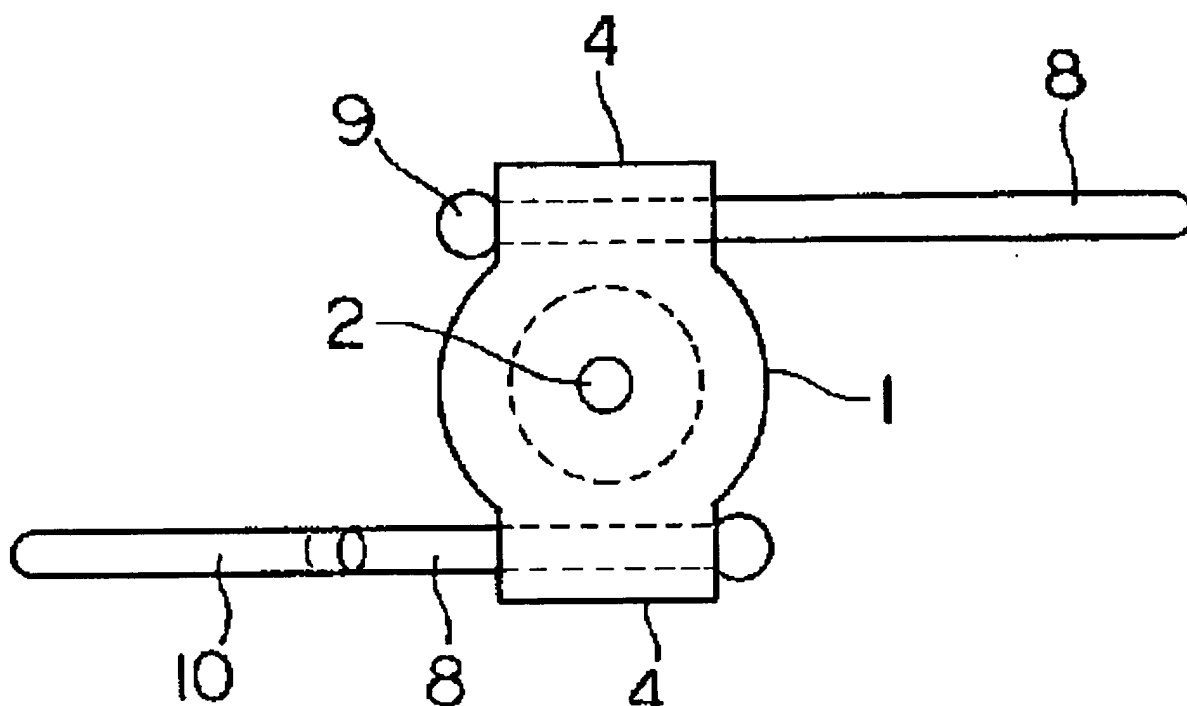

DESCRIPTION OF DRAWING(S) The figure shows the left side view of bait holding tool.

Holder (1)

Protruding portion (4)

Bait holding rod (8)
